Interpretation and Education

The role of California State Parks as a partner in education cannot be underestimated. Education of visitors to parks is termed interpretation. Interpretation is part education, part inspiration, part entertainment. It is a sharing of knowledge, enthusiasm, appreciation and wonder.

- Within the many units of the State Park System visitors will find a wide variety of interpretive programs:
 - Audio/visual programs
 - Campfire and amphitheater programs
 - Demonstrations and participatory activities
 - Dramatic presentations
 - Environmental Living Programs
 - Environmental Studies Programs
 - Festivals and fairs
 - Guided walks and tours
 - Hands-on and Discovery areas
 - Junior Engineer/Lifeguard/Naturalist/Ranger Programs
 - Litter Getter/Adopt-a-Beach program
 - Live domestic animals
 - Living History/Re-enactment Programs
 - Museums
 - Observatories
 - Puppet shows
 - Recycling Programs
 - School Programs
 - Self guided tours and nature trails
- In 2003/04, 3.15 million visitors enjoyed guided hikes, tours, talks and demonstrations; 95,000 attended campfire programs; 5 million visited museums and visitor centers in the parks; and 3.35 million went on self guided walks or tours.
- Young visitors can participate in programs designed specifically for them, such as Junior Rangers and Junior Lifeguards.
- More and more students live in urban areas where distance or economic and social barriers prevent them from visiting State Parks. In response to these situations, California State Parks initiated the Parks Online Resources for Teachers and Students (PORTS) program.
 - Using California's K-12 High Speed Network, PORTS is able to deliver video conference presentations to classrooms from parks throughout the state.
 - PORTS provides fully developed units of study that furnish support, structure, preparation and follow-up of the video conference.
 - Students study science, history, language arts and other academic content standards while interacting with California State Park staff through a video conference presentation.

California State Parks

Quick Facts

Last updated 1/23/2007

- Interpretive programs in California State Parks help teachers meet the core academic content standards adopted by the California Board of Education. State Park employees are aligning all school group interpretive programs with appropriate California Academic Content Standards. Field trips for schools to the natural and cultural areas administered by California State Parks offer students opportunities to relate the concepts taught in the classrooms to real examples they can see, touch and understand.
- In 2003/04, approximately 535,000 school children attend formal interpretive programs in state parks, underscoring the importance of parks as a component of the California Department of Education's school curriculum standards. Field trip statistics (2003/04 fiscal year):
 - Natural History and Cultural Heritage field trips - 536,000 students
 - Environmental Studies and Environmental Living Programs – 17,000 students
- California State Park staff also visit schools, bringing the park to the classroom. Over 48,500 students benefited from this type of program in the 2003/04 fiscal year.
- Not all interpretive programs in state parks are presented by paid employees. 16,609 volunteers contributed 950,430 hours to the department in 2005. Volunteers staff visitor centers, maintain trails, serve as camp hosts, give interpretive programs, present special events and do much, much more to share their love of the parks with the visiting public.
